AI SUMMARY

The user is experiencing chest pain, cough, breathlessness, nausea, vomiting, and dizziness, along with a known peanut allergy. This combination of symptoms and medical history indicates a high risk of serious underlying conditions, including heart attack, pulmonary embolism, and severe allergic reaction.

RECOMMENDATIONS

1

Seek immediate medical attention by calling emergency services (e.g., 911) or going to the nearest emergency department right away. Inform the medical team about your peanut allergy and any other relevant health information.
